

# Kai Fukazawa

(+1) 530-376-4215 | [kfukazawa@ucdavis.edu](mailto:kfukazawa@ucdavis.edu) | <https://kaifukazawa.github.io>

## EDUCATION

---

### University of California, Davis

September 2021 - Present

Ph.D. in Mechanical Engineering, GPA: (3.8/4.0)

*Research Focus:* Reinforcement Learning, Imitation Learning, Generative Models, Robotics

Supervised by Dr. Iman Soltani

### Kogakuin University

B.E. in Mechanical Engineering

April 2016 - March 2020

### Harvey Mudd College

Engineering Exchange Program

Jan 2019 - May 2019

## EXPERIENCE

---

### OIST

Research Internship

January 2021 - September 2021

[Project Report](#)

## PUBLICATIONS

---

### RAMAC: Multimodal Risk-Aware Offline Reinforcement Learning and the Role of Behavior Regularization

ICML 2026

K. Fukazawa, K. Mundada, I. Soltani

[Project Page](#) | [Paper](#) | [Code](#)

### Gaze on the Prize: Shaping Visual Attention with Return-Guided Contrastive Learning

A. Lee, I. Chuang, D. Gao, K. Fukazawa, I. Soltani

Under Review at ICRA 2027

[Project Page](#) | [Paper](#)

## RESEARCH PROJECTS

---

### Reliable Self-Improvement for Long-Horizon Robot Learning

K. Fukazawa, D. Amarsaikhan, I. Soltani

September 2026 – Present

Leading the development and evaluation of scalable methods for long-horizon robot self-improvement from accumulated failure and recovery experience, designing and analyzing real bimanual ALOHA experiments with ACT and  $\pi 0.5$  to characterize failure accumulation, distribution shift, and recovery.

### Mitigating Compounding Errors in Imitation Learning

K. Fukazawa, I. Soltani

February 2026 – Present

Developing an approach to reduce compounding errors in imitation learning without complicating the learning pipeline. Our preliminary simulation experiments show consistent improvements of **10-15%** over standard imitation learning baselines, including diffusion/act policies.

## TEACHING

---

### Teaching Assistant

Jan 2022 – Present

University of California, Davis

Courses: Numerical Analysis, Control Systems & Theory, Dynamics, Vehicle & Transportation Systems

## SKILLS

---

**Programming:** Python, C/C++, MATLAB, R, Java

**Machine Learning:** PyTorch, TensorFlow, JAX, Gym

**Others:** MuJoCo, PyBullet, Linux, Git, CUDA, ROS, Docker, OpenCV, Raspberry Pi

**Language:** English (Fluent), Japanese (Native)
